Arack, also spelt Arak is a distilled alcoholic drink typically produced in South Asia and Southeast Asia, made from either the fermented sap of coconut flowers, sugarcane, grain (e.g. red rice) or fruit, depending upon the country of origin. The clear distillate may be blended, aged in wooden barrels, or repeatedly distilled and filtered depending upon the taste and color objectives of the manufacturer. The Arak that we're using is made from fermented Snake Fruit (Salak Bali)
